Computer Science Engineering Student

Profil

Second year Images and Multimedia Computer Science student at engineering school ENSEEIHT in Toulouse, I am extremely passionate about new technologies and the truly incredible things that are done today thanks to computers. With a strong passion for creativity and visual expression, I am eager to contribute to fields where technology meets artistry.

Work Experience

2024–2025 4 months	**Data Processing Internship** *IRIT, Toulouse* Retrieval of satellite images and calculation of vegetation index based on GPS coordinates, and assistance in the detection and identification of arthropods.
2024 2 months	**Python Software Developer Internship** *Vitesco Technologies, Toulouse* Prototyping the processing of measurement files from electric battery test benches by creating a Python architecture that allows for processing, analyzing, and validating the proper execution of the tests.
2023–2024 1 year	**Private Math Tutor** *Toulouse* Personalized math tutoring for middle school and high school students, focusing on improving their understanding and problem-solving skills.
2018/2019 1 month	**English Lessons** *School Charlemagne, Rufisque, Senegal* Interventions with six primary school classes to introduce and teach some basic concepts of English. I learned to communicate effectively with a group of students while managing organization with the teachers and addressing material constraints.

Education

2027 3 years	**Computer Science Engineer Diploma** *ENSEEIHT, Toulouse*
2023 2 years	**CPGE MP** *High School Janson de Sailly, Paris*
2021	**Baccalauréat Mention Très Bien** *High School Le Caousou, Toulouse*
2021	**American Dual Diploma** *Academica, Remote*
